

Summary

Experienced Senior Software Engineer with over 6 years of expertise in Java backend development, AWS cloud architectures, and Microservices. Specialized in architecting high-performance, highly concurrent systems that solve complex, data-heavy enterprise challenges across Fraud Detection, Financial Services, and SaaS domains. Proven track record of leading end-to-end modernization efforts — from legacy migrations to JDK21 and containerized deployments with Docker and Kubernetes. Accelerates development lifecycles by integrating AI driven workflows, while mentoring cross-functional teams and driving engineering excellence through scalable, intelligent solutions.

Skills

- Java
 - MySQL
 - AWS
 - JBoss
- SpringBoot
 - Hibernate
 - System Design and Integration
 - Data Structure and Algorithm
- Docker
 - Micro-services
 - Jenkins
 - REST, SOAP
- Oracle Cloud
 - JS & JSP
 - Regex
 - Git and GitHub
- JSON
 - XML
 - JUnits
 - Claude

Experience

Experian | Hyderabad, Telangana

Senior Software Engineer | 12/2024 – Present

- Part of the FSD Team, which involves developing and improving the infrastructure for Fraud Detection in Financial Transaction.
- Worked on the upgradation of PreciseID, FraudAdmin, PreciseMatch and DeviceID tools, to provide better verification policies and rules.
- Worked on the API gateway, to gather data from different services and re-direct requests to correct services.
- Led the end-to-end architectural migration of legacy applications to AWS using Docker, while upgrading core systems from JDK8 to JDK21 to maximize scalability and performance and fixing major vulnerabilities.
- Orchestrating containerized microservices using Docker and Kubernetes, ensuring high availability and seamless server management.
- Collaborated with Excalibur and CloudNine teams in developing new ideas, initiatives, products and services.
- Modernized the user interfaces of multiple enterprise portals by upgrading legacy codebases to the latest JavaScript frameworks, ensuring seamless cross-browser compatibility and highly responsive frontend performance.
- Championing an AI-first culture by integrating Claude, Cursor, MCP servers, and other AI tools into the development lifecycle, boosting team productivity by almost 50%.

Oracle | Hyderabad, Telangana

Applications Engineer 2 | 08/2022 – 11/2024

- Spearheaded a strategic payment service integration with Mastercard and HSBC for Oracle Fusion Cloud Financials, optimizing revenue recognition and client cash flow.
- Architected and managed dynamic Docker deployments on Oracle VM, ensuring seamless Oracle DB integration and high system availability.
- Designed and implemented scalable microservices architectures to facilitate robust payment service integrations.
- Partnered with Tax and Project Management teams to innovate and launch new financial products on Fusion Payables for global enterprise and government clients.
- Maintain software products including programs, webapps and databases. Designed and developed new business features and enhancements on Fusion Payables. Incorporated new changes and solve bugs for corporations, universities and government organisations.
- Leveraged advanced PL/SQL optimization, SQLHC, and AWR analysis to boost database performance and ensure data integrity.
- Conducted SQLHC and AWR analyses and Implement data-fix scripts for database performance improvements.
- Integrated AI-driven workflows (Copilot and Claude) to automate coding tasks and documentation, achieving 30% increase in productivity.
- Established comprehensive automated testing frameworks using JUnit and UTPL/SQL to guarantee software quality.

HighRadius | Hyderabad, Telangana

Associate Software Engineer | 06/2021 - 07/2022

- Architected and developed core modules for the HighRadius Credit application using Java, Spring, Hibernate, ExtJS, and MySQL, implementing robust RESTful APIs. Leveraged AWS to enhance cloud infrastructure and scalability.
- Optimized system performance by implementing strategic multithreading solutions in Java, significantly reducing latency for critical processes.
- Integrated QuickBooks and WorldPay with the HighRadius Credit product, designing and implementing new credit limit functionalities which led to the acquisition of additional clients and significantly improved payment efficiency.
- Engineered a highly flexible Dynamic Notification System, enabling customized in-portal alerts based on specific merchant criteria to boost user engagement. This system was tailored to meet varying criteria set by merchants or users, enhancing flexibility and user engagement.
- Delivered over 50+ functional enhancements and software features based on client requirements, while resolving critical production bottlenecks.
- Mentored and trained a cohort of 20 interns and new hires, fostering best practices in SaaS development.

HighRadius | Bhubaneshwar, Odisha

Junior Engineer | 06/2020 - 05/2021

- Developed a high-efficiency framework for autonomous testing of flagship products like HighRadius Credit and EIPP.
- Led a team of 6 engineers in designing and delivering critical User Stories for the EIPP product suite.
- Enhanced the framework with database and mail verification systems.
- Established comprehensive test scripts and automation protocols in collaboration with the QA team.
- Engineered robust solutions for parsing complex PDF, TXT, and XLSX files using advanced Regex patterns.

Awards & Recognition

- **NIKE Technology Transformation** (2026) from Experian for completing the migration of multiple projects from on-Prem to AWS.
- **Star Team Award** (2021) from HighRadius for mentoring 20+ Highakos to complete their first project.
- **The HighFlyer** (2021) from HighRadius on R&D for integration and enhancements of mail and database systems in Automation framework and are integrated to both Credit and EIPP.

Projects

- **Enterprise Legacy Modernization** - Led the end-to-end architectural migration of legacy monolithic applications to a modern, cloud-native microservices architecture deployed on AWS with Docker containerization and Kubernetes orchestration. Upgraded core systems from JDK8 to JDK21, implemented phased rollout strategies with automated rollbacks, and established zero-downtime CI/CD pipelines with Disaster Recovery, significantly improving scalability, resilience, and deployment velocity.
- **Legal Entity Localisation** - Solely developed and tested the implementation of Legal Entity Localization, enabling clients to issue invoices customized for individual companies, Legal Entity IDs, and currencies. Utilized AWS services to fetch critical legal entity information, improving invoice customization accuracy and ensuring compliance. This initiative significantly enhanced invoice accuracy and compliance through the integration of dynamic billing criteria.
- **Parallel Invoice Processing** - Engineered and integrated Parallel Invoice Processing across the Credit product, reducing Credit Limits and Risk Factors approval time by almost 80% during financial year endings through automated processing. Enhanced operational efficiency, handling up to 20 to 100 invoices concurrently.
- **QuickBooks Integration** – Designed and developed seamless integration of QuickBooks and WorldPay with the HighRadius Credit Management, facilitating data import from CRM systems and optimizing payment and tax management. Streamlined financial operations, handling over 10,000 transactions monthly.
- **Dynamic Notification Infrastructure** - Developed a scalable infrastructure for dynamic notifications, enabling clients to send personalized alerts based on predefined parameters. Boosted client engagement by 25% through targeted communication strategies.

Education

Kalinga Institute of Industrial Technology (KIIT) University | B. Tech. (Computer Science and Engineering)

- Majored in Computer Science and Engineering
- Graduated with 9.13 CGPA

Birla Institute of Technology & Science (BITS) Pilani, Hyderabad | M. Tech. (Software Engineering)

- Specialised in Software Engineering
(Full Stack, Security, DevOps, Scalability, Cross-platform, Cloud, Software Architecture, Middleware, Open-Source, Agile)
- Post-Graduated with 8 CGPA

Certifications

- **OCI Foundations Associate** (11/2023) - Oracle Cloud Infrastructure
- **Product Essentials Program** (06/2021)
- **Basic Python Certification** (06/2019)
- **NIIT Java Certification** (05/2018) - Core Java

Personal Projects

- [Book Exchange Platform](#) - Engineered a Java and React-based web application using SpringBoot and MySQL. This platform allows users to list books for rent or exchange via peer-to-peer, enhancing user interaction and book accessibility.
- [QuickTask Application](#) - Developed an Android application using Flutter and Dart for task management. Users can add, track, and complete tasks efficiently, enhancing productivity and organization.
- [Investment Planner](#) - Developed a Java-based application for financial planning. It calculates required investments to achieve target profits and handles investment strategies for risk management.
- [Financial Planner](#) - Developed a Google Sheets-based financial planner that calculates income tax and available investment amount by factoring in in-hand salary, EMIs, rent, insurance, and other deductions.
- [Algorithmic Investment Tracker](#) - Implemented a Google Sheets-based complex tool to monitor real-time metrics of personal investment portfolios. This tool facilitates informed decision-making based on current market data to maximise profit and minimise risk.
- [My Career Portfolio](#) - This project serves as a comprehensive digital resume. The platform integrates intelligent AI chatbot and to provide an interactive experience for visitors seeking to learn more about my background.
- [OS Processes Scheduler](#) - Designed and implemented a C++ and bash project focused on OS Scheduling for a single-core CPU with infinite I/O resources. Implemented detailed execution paths for processes, optimizing resource allocation and scheduling efficiency.
- [Beautiful Bengal V3](#) - Developed and hosted a website showcasing West Bengal's tourism attractions. The site provides information to promote tourism and cultural heritage, aiming to attract visitors and promote local tourism.
