

Summary

Senior Software Engineer with nearly 5 years of experience, primarily focused on backend development. Skilled in building scalable Java-based systems, designing RESTful APIs, and managing relational databases. Known for delivering clean, maintainable code and collaborating effectively within cross-functional teams. Brings a strong problem-solving mindset and a continuous learning approach to every project, contributing to both technical excellence and business outcomes.

Skills

- Java
 - MySQL
 - PL/SQL
 - Web Services
- SpringBoot
 - Hibernate
 - Object Oriented Programming
 - Data Structure & Algorithm
- Docker
 - AWS
 - REST
 - SOAP
- Oracle Cloud
 - ADF UI
 - Regex
 - GitHub
- JSON
 - XML
 - JUnits
 - ChatGPT

Experience

Experian | Hyderabad, Telangana
Senior Software Engineer | 12/2024 – Present

- Part of the FSD Team, which involves developing and improving the infrastructure for Fraud Detection in Financial Transaction.
- Leading modernization efforts of the PreciseMatch tool by upgrading to the latest versions of JDK, Spring, and Hibernate.
- Working on the upgradation of PreciseID tool, to provide better fraud analytics and verification policies.
- Working on the API gateway, to gather data from different services and re-direct requests to correct services.

Oracle | Hyderabad, Telangana
Applications Engineer 2 | 08/2022 – 11/2024

- Led the integration of a new payment service in partnership with Mastercard and HSBC, which significantly enhanced revenue for Oracle Fusion Cloud Financials. This initiative improved clients' cash flow cycles and optimized the revenue recognition process.
- Deploy and maintain dynamic Docker deployments for my team on Oracle VM with seamless Oracle DB integration.
- Collaborated with Tax and Project Management teams in developing new ideas, initiatives, products and services.
- Designed and implemented microservices to enhance the scalability and integration of new payment services.
- Modify, incorporate new changes and solve bugs for corporations, universities and government organisations.
- Maintain software products including programs, webpages, and databases. Designed and developed new business features and enhancements on Fusion Payables.
- Leveraged PL/SQL to boost DB performance, ensuring rock-solid reliability and safeguarding against data corruption.
- Conducted SQLHC and AWR analyses and Implement data-fix scripts for database performance improvements.
- Utilized AI tools like ChatGPT, Claude and Gemini to automate repetitive coding tasks, generate documentation, and provide instant troubleshooting assistance, leading to a 30% increase in overall productivity.
- Developed automated test suites using tools like JUnit, UTPL/SQL, ensuring the quality and reliability of software features.

HighRadius | Hyderabad, Telangana
Associate Software Engineer | 06/2021 - 07/2022

- Contributed to the design, development, and testing of the HighRadius Credit application as part of a collaborative team. Utilized Java, Spring, Hibernate, ExtJS, MySQL, and implemented RESTful services and APIs, optimizing performance with strategic multithreading implementations. Leveraged AWS to enhance cloud infrastructure and scalability.
- Integrated QuickBooks and WorldPay with the HighRadius Credit product, designing and implementing new credit limit functionalities. This strategic enhancement led to the acquisition of additional clients and significantly improved payment efficiency.
- Engineered a new Dynamic Notification system, a key feature of our SaaS product, enabling customized in-portal notifications for selected customers. This system was tailored to meet varying criteria set by merchants or users, enhancing flexibility and user engagement.
- Addressed and fixed core issues in the Credit product, significantly enhancing efficiency, resolved bugs, data issues, and developed/documented over 50 software features.
- Trained and mentored 20 interns and new joiners, sharing best practices and knowledge within the SaaS development team.

HighRadius | Bhubaneshwar, Odisha
Junior Engineer | 06/2020 - 05/2021

- Developed the framework for faster autonomous testing of software products like HighRadius Credit and EIPP.
- Led a team of 6, designing and delivering User Stories for EIPP product.
- Enhanced the framework with database and mail verification systems.
- Established scripts, test cases, and automation protocols with the QA team.
- Developed solutions for uploading and parsing PDF, TXT and XLSX files using Regex.

Awards & Recognition

- **Star Team Award** (Q2, 2021) from HighRadius for mentoring 20+ Highakos to complete their first project.
- **The HighFlyer** (2021) from HighRadius on R&D for integration and enhancements of mail and database systems in Automation framework and are integrated to both Credit and EIPP.

Projects

- **Legal Entity Localisation** - Solely developed and tested the implementation of Legal Entity Localization, enabling clients to issue invoices customized for individual companies, Legal Entity IDs, and currencies. Utilized AWS services to fetch critical legal entity information, improving invoice customization accuracy and ensuring compliance. This initiative significantly enhanced invoice accuracy and compliance through the integration of dynamic billing criteria.
- **Parallel Invoice Processing** - Engineered and integrated Parallel Invoice Processing across the Credit product, reducing Credit Limits and Risk Factors approval time by almost 80% during financial year endings through automated processing. Enhanced operational efficiency, handling up to 20 to 100 invoices concurrently.
- **QuickBooks Integration** – Designed and developed seamless integration of QuickBooks and WorldPay with the HighRadius Credit Management, facilitating data import from CRM systems and optimizing payment and tax management. Streamlined financial operations, handling over 10,000 transactions monthly.
- **Dynamic Notification Infrastructure** - Developed a scalable infrastructure for dynamic notifications, enabling clients to send personalized alerts based on predefined parameters. Boosted client engagement by 25% through targeted communication strategies.

Education

Kalinga Institute of Industrial Technology (KIIT) University | B. Tech. (Computer Science and Engineering)

- Majored in Computer Science and Engineering
- Graduated with 9.13 CGPA

Birla Institute of Technology & Science (BITS) Pilani, Hyderabad | M. Tech. (Software Engineering)

- Specialised in Software Engineering
(Full Stack, Security, DevOps, Scalability, Cross-platform, Cloud, Software Architecture, Middleware, Open-Source, Agile)
- Post-Graduated with 8 CGPA

Certifications

- **OCI Foundations Associate** (11/2023) - Oracle Cloud Infrastructure
- **Product Essentials Program** (06/2021)
- **Basic Python Certification** (06/2019)
- **NIIT Java Certification** (05/2018) - Core Java

Personal Projects

- [Book Exchange Platform](#) - Engineered a Java and React-based web application using SpringBoot and MySQL. This platform allows users to list books for rent or exchange via peer-to-peer, enhancing user interaction and book accessibility.
- [QuickTask Application](#) - Developed an Android application using Flutter and Dart for task management. Users can add, track, and complete tasks efficiently, enhancing productivity and organization.
- [Investment Planner](#) - Developed a Java-based application for financial planning. It calculates required investments to achieve target profits and handles investment strategies for risk management.
- [Financial Planner](#) - Developed a Google Sheets-based financial planner that calculates income tax and available investment amount by factoring in in-hand salary, EMIs, rent, insurance, and other deductions.
- [Investment Tracker](#) – Implemented a Google Sheets-based complex tool to monitor real-time metrics of personal investment portfolios. This tool facilitates informed decision-making based on current market data to maximise profit and minimise risk.
- [OS Processes Scheduler](#) - Designed and implemented a C++ and bash project focused on OS Scheduling for a single-core CPU with infinite I/O resources. Implemented detailed execution paths for processes, optimizing resource allocation and scheduling efficiency.
- **West Bengal Tourism** - Developed and hosted a website showcasing West Bengal's tourism attractions. The site provides information to promote tourism and cultural heritage, aiming to attract visitors and promote local tourism.
